

Process of cost calculation:
*Note Each ticket reserved is worth \$20

1. Rough total cost = Total tickets reserved * 20
2. Final total cost = Rough total cost – Total donations (if negative, event is free)
3. Members ticket cost = Final total cost / Total Member attendees (that didn't donate to event)

*Based this on how the project detail described the process
*Members ticket cost are only calculated after ticket reservation / Even registration has closed
